Full Time - U.S.-based – Woburn and  
Devens Massachusetts

## START DATE

Q2/Q3 2022

## ABOUT CONTINUUS

CONTINUUS Pharmaceuticals is a spin-out company from the Novartis-MIT Center for Continuous Manufacturing. We design and develop innovative continuous manufacturing processes for pharmaceutical clients, providing an exceptional "one-stop solution" for the entire drug development and manufacturing cycle.

Rather than producing medicines through traditional batch processes, CONTINUUS offers a breakthrough Integrated Continuous Manufacturing (ICM) technology for small molecule drugs. The synthesis of the active pharmaceutical ingredient and final dosage form are integrated into a seamless and completely automated process. This novel method will allow "on-demand" manufacturing of pharmaceuticals with significant advantages in production lead time, quality, and cost.

Our pipeline is rapidly growing, with exciting projects with pharmaceutical and generic companies, as well as contracts with the US Government. Concurrently, we are transitioning to a commercial phase, where we will leverage our novel ICM platform to produce low-cost, high-quality drugs for patients worldwide. Essential to our evolution will be talented new team members who will contribute greatly to this mission. We look forward to meeting you.

## Sr / Facilities Engineer

### Job Description

CONTINUUS is looking to hire a full-time Senior / Facilities Engineer, who will be responsible for the following:

- Subject Matter Expert for the daily maintenance and operation of general office space, laboratories, and cGMP manufacturing factories.
- Engineering resource for the Metrology group. SME for clean and base building instrumentation.
- SME oversight of the CMMS Work Order system to be used for documenting facilities request as well as triaging and compliance leveling of requested work.
- Oversee the daily operations of the facilities team operations including process mechanics, utility and HVAC mechanics, and cleaning.
- Maintain the effectiveness and operational monitoring of the cGMP manufacturing facility including, manufacturing clean suites, storage, labs, and mechanical and utility space.
- Coordinate the service and maintenance of plant utility systems including process gasses and water, HVAC, solvent distribution, plant steam, electrical, waste streams, and other site utilities.
- Provide supervision, training, and guidance to the facility mechanics.
- Responsible for 24/7 utilities operations and production support on the manufacturing plant.
- The position will grow to Head of ICM Facilities Maintenance and Metrology for both the Woburn and Devens location.

### Required Qualifications

- Strong knowledge of PI&D drawings, sequence of operations, engineering systems proposals SOP writing, Change Controls, Exception Investigations.
- Experience with pharmaceutical or biotechnology manufacturing equipment, complex GMP buildings and clean rooms, laboratory system operations, including building automation systems, HVAC, electrical and plumbing systems.
- Demonstrated abilities and evidence of training in repair, operation, and troubleshooting of process and utility systems.
- 5+ years of relevant experience in pharmaceutical or medical device industries in a leadership role and/or a supervisory capacity.
- Effective written and oral communication skills at individual, team, and organizational levels.
- Experience working on cross-functional teams and managing relationships in collaborative, constructive manner with internal departments and project vendors and partners.
- Ability to handle multiple priorities within rapid timelines to meet project team goals.
- Proficiency in Good Documentation Practices (GDP) and GMP documentation review.
- Ability to coordinate activities and make critical decisions related to facility issues and emergencies.

### Preferred Qualifications

- BS in mechanical engineering or related engineering discipline and 10+ years of pharmaceutical experience or Licensed Master Electrician – HVAC Mechanic .
- Ability to obtain a Massachusetts Wastewater Treatment license.
- Ability to obtain a Massachusetts Fireman's or 3rd Engineers license.
- Experience using Microsoft Office Suite and CMMS software.
- Previous cGMP Manufacturing experience.

- Knowledge of cGMP, 21 CFR 210, 211, and Part 11, and the International Council for Harmonisation (ICH), GAMP 5, and United States Pharmacopeia (USP) guidelines.
