CONTINUUS Pharmaceuticals, Inc.

## LOCATION

25-R Olympia Avenue  
Woburn, MA  
(20 minutes north of Boston)

## EMPLOYMENT TYPE

Full Time - U.S.-based

## START DATE

## ABOUT CONTINUUS

CONTINUUS Pharmaceuticals is a spin-out company from the Novartis-MIT Center for Continuous Manufacturing. We design and develop innovative continuous manufacturing processes for pharmaceutical clients, providing an exceptional "one-stop solution" for the entire drug development and manufacturing cycle.

Rather than producing medicines through traditional batch processes, CONTINUUS offers a breakthrough Integrated Continuous Manufacturing (ICM) technology for small molecule drugs. The synthesis of the active pharmaceutical ingredient and final dosage form are integrated into a seamless and completely automated process. This novel method will allow "on-demand" manufacturing of pharmaceuticals with significant advantages in production lead time, quality, and cost.

Our pipeline is rapidly growing, with exciting projects with pharmaceutical and generic companies, as well as contracts with the US Government. Concurrently, we are transitioning to a commercial phase, where we will leverage our novel ICM platform to produce low-cost, high-quality drugs for patients worldwide. Essential to our evolution will be talented new team members who will contribute greatly to this mission. We look forward to meeting you.

## Head of IT

### Job Description

Responsible for the management, strategy, and execution of Operational and Information Technology infrastructure associated office, laboratory, and pharmaceutical manufacturing facility.

- Overseeing technical projects in alignment with organizational goals
- Directing the effective delivery of networks, development, and disaster recovery systems and processes
- Working with operational and information engineers to find solutions to manage business activities
- Preparing **financial budgets** and presenting **proposals** for capital projects
- Researching and recommending new products
- Develop an environment which fosters a high-performance and innovative organization
- Achieve the most efficient operations providing highest business value through effective management of IT/OT resources (**people, financial resources, services, vendors, and advisors**)
- Manage CONTINUUS Pharmaceuticals' servers, cloud storage, and data management and integrity
- Lead the strategy for integration of real-time process data through control systems into Electronic Batch Records and ERP
- Manage the Computer Validation for GMP systems.
- Manage the system architecture to support **PAT (Process Analytical Technology)** to achieve Real-Time-Product-Release Testing

### Required Qualifications

- Bachelor of Science degree in Engineering
- 10 years experience in Information Technology, or related discipline
- 10 years experience in pharmaceutical manufacturing with automated systems
- 10 years experience operating in a GMP environment
- Experience in applying computer validation to automated systems and all GMP relevant IT systems
- Sound knowledge of Project Management methodology, IT standards and Processes
- Experience with small companies and establishing a culture of quality
- Capable of working independently and as part of a cross-functional team of experts; capable of influencing and creating alignment across multiple functional areas
- Experience in supporting FDA audits

### Preferred Qualifications

- Knowledge of pharmaceutical quality systems supporting development and manufacturing environments
