Analytical Chemist Full-Time Position

About CONTINUUS Pharmaceuticals

CONTINUUS Pharmaceuticals is a spin-out company from the Novartis-MIT Center for Continuous Manufacturing. CONTINUUS designs and develops innovative continuous manufacturing processes for pharmaceutical clients, providing them with an exceptional "one-shop solution" for the entire drug development and manufacturing cycle.

Rather than producing medicines through batch-wise, step-by-step processes, CONTINUUS Pharmaceuticals offers a breakthrough Integrated Continuous Manufacturing (ICM) technology for small molecule pharmaceuticals. The synthesis of the active ingredient and the final dosage form are integrated into a seamless and completely automated process. This novel method will allow "on-demand" manufacturing of pharmaceuticals with significant advantages in production lead time, quality, and cost.

CONTINUUS is working with several major pharmaceutical and generic companies on the implementation of ICM for both novel and already-marketed drugs. New hires will work directly on these projects.

Job Posting

CONTINUUS is looking to hire a full-time analytical chemist to work on the analysis of samples (mainly HPLC) from continuous manufacturing processes for small-molecule pharmaceuticals. This represents a unique opportunity to become involved in the development of next generation drug manufacturing technologies as a key member of a fast-growing company. The individual must thrive in a fast-paced environment, be adaptable and motivated by the opportunity to learn new technologies. Responsibilities include:

- Conduct routine and non-routine analyses of raw materials, in-process materials, stability, and finished products
- Complete documentation needed to support testing procedures, including test forms and logbooks
- Update peers/supervisors on progress at group meetings
- Run, maintain, calibrate, and troubleshoot laboratory instrumentation

Basic Qualifications

- B.S. or M.S. in Analytical Chemistry or a related field
- Familiarity with cGMP regulations
- Experience with analytical instruments such as HPLC, LC-MS, and GC
- Proficiency with vendor software (Agilent or Waters)
- Excellent written and verbal communications skills
- Ability to work well in cross-functional teams

Preferred Qualifications

- 1-3 years industrial experience
